

THE DAILY SENTINEL ON EARLY TRAINS.

The DAILY SENTINEL is sent by all the early morning express and freight trains, and delivered to subscribers in adjacent towns about the same time it is distributed in this city. This enables readers at a distance from the Capital of Indiana, to get the news of the day from six to twelve hours before they can receive it through papers published elsewhere. News dealers and carriers in any of the towns on railroads centering at Indianapolis, will be supplied with the SENTINEL on as good terms as any other paper. Clubs for the Daily will be supplied at Agents' rates. Orders are solicited.

Proceedings of the State Convention.

The extra edition of the *Sentinel*, containing the proceedings of the 8th of January Convention, being exhausted, and to meet the additional orders we are daily receiving for them, we have concluded to publish another edition of larger type. Those of our friends who desire to order them will please do so promptly.

Price \$1 per hundred.

No better document can be circulated to disseminate the public mind of the enormous impositions that unscrupulous papers and politicians have attempted to create in regard to the character of the Convention and its action upon the momentous issues now before the country.

The Weekly Sentinel of the 17th inst.

This issue of the *Indiana Weekly State Sentinel* will contain the speeches of Senator Wright, vindicating himself against the charges brought against him by his political adversaries previous to his expulsion, and the speech of the Hon. S. S. Cox, of Ohio, in reply to the Rev. Mr. Gurley, and in vindication of the war policy of Major General McClellan. Both documents are of great interest, and those wishing copies of the paper containing them can leave their orders at the clerk's desk of the *Sentinel* counting-room.

Military Items.

INDIANAS KILLED AT FORT HENRY.—A detachment from one of the Indiana regiments, taken on the Essex just before engaging the enemy, was as sharpshooters, under command of Daniel Trotter, lost some of their men. Charles Stocker, killed; Lewis Gault, do; Lieutenant Trotter, Charles E. Erb, J. L. Chap, scalded, Wm. O'Neill, Benjamin Loebe, missing. Lieutenant Trotter is badly scalded.

—Two rebel mail carriers were arrested by the Deputy Surveyor at Princeton, Indiana, a few days since, and a large number of letters found packed in their clothes and boot legs. They were making for New Harmony, at which point they intended crossing the river to escape South.

A number of these letters are from Europe, and from the solicitude manifested by the rebels after they were discovered, are supposed to contain information of great importance. They were sent to General Buell, at Louisville.

—**DEATHS IN THE HOSPITAL AT LOUISVILLE.**—The following soldiers died in the hospital at Louisville during the week ending, February 7, 1862:

February 5.—Stephen Miller, Company B, 37th Indiana; Herman S. Gould, Company A, 43d Indiana; Jacob Allen, Company G, 50th Indiana; James Constable, Company G, 38th Indiana; E. Wright, Company K, 60th Indiana; Peter J. Courty, Company B, 38th Indiana.

—We were pleased to see Major Gordon, of the U. S. regular army, on the streets yesterday, recovered from his recent severe indisposition.

—It was rumored on the streets yesterday that the 19th regiment United States Infantry would shortly take its departure for the seat of war. The men made their appearance on the streets yesterday in full dress parade, and they and their officers bore themselves gallantly—their soldierly maneuvers being the admiration of all citizens.

—**Capt. James Thompson, of the 17th Indiana, Col. Haxell, now in Maryland, lately** returned with a number of recruits to join his regiment. Capt. Thompson is the son of the distinguished Surgeon of this city, Dr. Wm. C. Thompson, who also holds a position in the army.

—**TROUBLE IN THE IRISH REGIMENT.**—We hear a rumor that Capt. Tobin, Lieut. Galligan and Lieut. Daily, of this place, together with Lieut. Col. Ryan and Capt. Conklin, of Indianapolis, having been summoned before the Military Examining Board, have tendered their resignations. They allege, we understand, that there was an unjust discrimination against them in favor of other officers more competent than these.

—**REMOVED ARREST.**—It is rumored that Peter Scully, Squire of the 35th Indiana (1st Irish), has been arrested for an assault upon the Provost Marshal of Harpersburg.

—The 59th Indiana, Col. Alexander, which rendezvoused at Gosport, is, we understand, under marching orders, and will probably proceed to the seat of war in a few days.

—We understand that Lieut. B. F. Reed, late of the 19th Indiana, Col. Merrill, is about to re-enter the army. He is a brave and intelligent gentleman, and will undoubtedly acquire himself with honor and credit to the glorious flag he will follow in any capacity in which he may be placed.

For the Daily State Sentinel.

Mr. Ensign—I understand the Ames Institute intend teaching our citizens with an experimental lecture on the science of Chemistry next Friday evening by Professor Tingley of Asbury University.

In these days when lectures are as numerous as their hearers, and of as endless varieties of merit and demerit, it is difficult to choose between those who possess real worth and those who do not. It is to recommend the above that I wish to claim a small space in your paper this morning.

The Professor is widely known as the most interesting and successful experimenter in the country, having made this particular branch of science his study for years, and having in the meantime accumulated his apparatus until he has one of the most extensive and complete collections in the United States. He will also have access to the large variety of apparatus of the University. I predict that it will be the most instructing, entertaining and amusing lecture of the season, and well worth the time and money of all who attend.

METROPOLITAN HALL.—This evening will be most positively the last of the celebrated play of the Octoroon, which has been so successful this week, which success is more attributable to the excellent manner in which it is acted, and the faithful representations of the plantation scenes, Mississippi river steamboat, and all the concomitants, than to any merit in the play itself. But the admirable acting of Miss Kimberly and all concerned render it more than ordinarily interesting. Last night was to have been the last, but the applications for one more performance have induced the management to yield. To-morrow night is the benefit and last night but one of Miss Kimberly's engagement.

Police Court.—There was nothing of special moment transacted before his honor, Mayor Maxwell, yesterday. A few drinks, a few derelicts, a few assaults, and a few cases of hitting to lamp posts, summed up the whole thing. We compliment the officials, from his honor down, for keeping one eye cocked all the time upon the costs in each of the aforesaid cases.

The exhibit of the Bank of Kentucky for the commencement of the year shows a very flattering condition of things.

The *Brookville Democrat* says that three new churches are in course of erection in Franklin county.

Remember that W. H. Talbot & Co., fashionable jewelers, engrave your full name, date, &c., free of all charge on all watches, jewelry or silverware bought of them.

NATIONAL TAX ON GAS.—We learn from Washington that a bill was under consideration, by the proper committee, to assess a tax, on every 1,000 cubic feet of gas consumed, the tax to be paid by the companies.

INDIANAPOLIS GAZETTE.—The quotations yesterday corrected by John Carlisle & Son were as follows: Wheat, white, 75 to 80; red, 75 to 78; Oats 22 to 25; Rye, 50 to 60; Buckwheat, 30; Hay, loaded, 10 to 12; loose, 7 to 10.

A liberal discount will be made to schools desiring to attend Prof. Tingley's lecture on Chemistry to-morrow night, at Masonic Hall. Teachers who may desire to have their pupils attend can make the arrangements for their admission by calling upon W. H. Smith, at Dunlop's insurance office.

Make your purchases where you do not have to pay a little extra for engraving your name on jewelry or silverware. W. H. Talbot & Co., having the only engraver in the city enabled to do, and to engrave all goods bought of them without any extra charge.

DEDICATION OF THE CATHOLIC CHURCH AT DELPHI.—The new Catholic Church in Delphi was solemnly dedicated on Sunday last. The Right Rev. Bishop of St. Pauls, of Vincennes, and the Rt. Rev. Bishop Laers, of Fort Wayne, took part in the ceremonies of the day.

CANDIDATES FOR BRIGHT'S PLACE.—The following gentlemen are named as the probable successors of Bright: Gov. Wright, John P. Usher, R. Dale Owen, Judge DeBruiter, R. W. Thompson, Ex-Gov. Hammond, (party is now out aside), and last, but not least, the chief editor of the *Vincennes Gazette*, Hon. C. M. Allen.

SITUATION WANTED.—J. S. Anderson, a young gentleman of intelligence and integrity, desires a situation as a clerk for some legal firm or for some office, county or State. Apply at No. 31 West Washington Street. We can conscientiously recommend Mr. Anderson as possessing all the qualifications we have indicated.

WINCHELL.—This highest of all humorists, ventriloquists and comical individuals opens in College Hall to-night. Laugh while you may; time and the hour run through the roughest day. Go and see Winchell. A more genial, a more jovial, a more companionable and a more gifted gentleman can not be found the world over.

THE LAWYER-REGISTER.—This sterling Democratic newspaper, which Addison Bookwater, Esq., is the able and accomplished editor, appeared last week in new type. We commend the *Register* to the Democrats of Davidson county, to the Democrats of the 4th Congressional District, and to the Democrats of the whole State. There is no better weekly published in the West, and we are glad to note that the enterprise of its proprietor is suitably rewarded.

MARION COMMON PLEAS.—This Court, Judge Ray presiding, is rapidly dispatching business. Yesterday Augustus Turner, a colored gentleman, on trial for disturbing a public meeting of his colored brethren and sisters, was acquitted.

In the habeas corpus case, noticed yesterday, in which John H. Baker, who had enlisted in the 11th Indiana Infantry, having a wife and a child, sought his discharge on the ground that he was not a single man, the case went against the soldier. He is retained in the army.

IMPROVEMENT.—We were shown yesterday the plans and elevations of a building, to be erected this season, by A. E. Vinton, Esq., on Meridian street, second square north of the Circle, for a family residence. It will be, when finished, one of the finest appearing dwellings in the city, as also, one of the most substantial, convenient and comfortable. The design was drawn by D. A. Bolen, architect, and displays excellent taste and skill. The following are the contractors: Cut stone work by Scott, Nicholson & Co.; the brick work by Jacob Rahs; the basement and rubble work by Henry Helm; and the carpenter and joiner work by J. L. & M. K. Fatout, whose thorough workmanship has been tested on some of the best buildings in the city, and whom we can recommend as among the most skillful, enterprising, energetic and prompt of our builders. They are men who fill their contracts to the letter, make or lose. Mr. Vinton's building complete for occupancy, as designed, can not cost less than \$10,000. There will be several more of the same sort erected this season.

FRANKENSTEIN'S PANORAMA OF NIAGARA will be exhibited in Indianapolis, at Masonic Hall, on Saturday, Monday and Tuesday evening, and on Tuesday afternoon, at half past three o'clock. It is conceived by all that this is the most excellent work in the country, probably extant. It has been exhibited for eight years, and has met with constant success. It is by no means simply one view of the falls, but consists of a great number of scenes of the most beautiful variety. For instance, the rainbow in full circle, nowhere else to be seen; Niagara yields us in the Cave of Winds. The cave itself is a highly interesting locality. The winter scenes are full of interest and delight the eye beyond all power of description. The beautiful ice trees to be seen on Lundy Island make an impression on the mind which can never be erased. Then there are the moonlight views, the beautiful sunset, the Horse Shoe Fall as seen in a dark night by the light of a fire, the great spray cloud rolling upward like a huge column of fire, the tranquil water scene, so celebrated in the panorama, is very beautiful.

Mr. Frankenstein, the artist, has not only an American but a European reputation. Jean-Lind, when in this country, engaged him to paint for his house large pictures, two of which were views of the Falls. The same scenes may be seen in the Panorama. The present Duke of Buckingham, when in this country, then the Marquis of Chandos, and of the Prince of Wales's suite, ordered of both the brothers, John and Geoffrey Frankenstein, a number of paintings of the Falls.

The Panorama shows where Blodion crossed on the rope; shows where Sam Patch jumped, and gives some interesting particulars of the man crossing on stilts.

The price of admission to the Panorama is 25 cents—15 cents for children. Doors will open at 7 o'clock. The Panorama will begin to move at half past 7.

From Mrs. M. McMillan, Editor of *Roberts Chase* (HARRISBURG, October 6, 1857).

Dr. C. W. ROBERTS.—Dear Sir: I have used your Blood Purifier for a nervous affection, from which I have suffered much at times. While it is pleasant to the taste, it certainly has a powerful effect upon the nerves. Please accept my thanks for your kind regards, and believe me, Yours truly, J. W. T. McMillan.

Police Court.—There was nothing of special moment transacted before his honor, Mayor Maxwell, yesterday. A few drinks, a few derelicts, a few assaults, and a few cases of hitting to lamp posts, summed up the whole thing. We compliment the officials, from his honor down, for keeping one eye cocked all the time upon the costs in each of the aforesaid cases.

For the Daily State Sentinel.

Mr. Ensign—I understand the Ames Institute intend teaching our citizens with an experimental lecture on the science of Chemistry next Friday evening by Professor Tingley of Asbury University.

In these days when lectures are as numerous as their hearers, and of as endless varieties of merit and demerit, it is difficult to choose between those who possess real worth and those who do not. It is to recommend the above that I wish to claim a small space in your paper this morning.

The Professor is widely known as the most interesting and successful experimenter in the country, having made this particular branch of science his study for years, and having in the meantime accumulated his apparatus until he has one of the most extensive and complete collections in the United States. He will also have access to the large variety of apparatus of the University. I predict that it will be the most instructing, entertaining and amusing lecture of the season, and well worth the time and money of all who attend.

METROPOLITAN HALL.—This evening will be most positively the last of the celebrated play of the Octoroon, which has been so successful this week, which success is more attributable to the excellent manner in which it is acted, and the faithful representations of the plantation scenes, Mississippi river steamboat, and all the concomitants, than to any merit in the play itself. But the admirable acting of Miss Kimberly and all concerned render it more than ordinarily interesting. Last night was to have been the last, but the applications for one more performance have induced the management to yield. To-morrow night is the benefit and last night but one of Miss Kimberly's engagement.

Police Court.—There was nothing of special moment transacted before his honor, Mayor Maxwell, yesterday. A few drinks, a few derelicts, a few assaults, and a few cases of hitting to lamp posts, summed up the whole thing. We compliment the officials, from his honor down, for keeping one eye cocked all the time upon the costs in each of the aforesaid cases.

GATHER ROSE-BUDS WHILE YOU MAY.

BY FLETCHER JOHNSON.

This life to us is but a dream,
A bubble on the stream;
Friends the truest soonest fly,
Hopes the fondest soonest die.
Summer blossoms soon decay,
Gather rose-buds while you may.

Not for silver gold and heap,
But yourself the harvest reap;
Lay not up a golden store;
To be spent when you're no more.

For nature smiling, seems to say,
"Gather rose-buds while you may."
Gather wisdom—truth sublime,
Fill your soul with lofty rhyme;
Pluck life's flowers in their bloom,
Exhaust all their sweet perfume.

Look at once in pleasure's eye,
Gather rose-buds while you may."
Time is short, but unto those
Who battle bravely with life's woes—
As time flies—to them its given
On his wings to fly to heaven;
Then let us cast all fears away,
And "gather rose-buds while you may."

UNITED STATES CIRCUIT COURT.—Yesterday morning, Judge Treat presiding, the time of this Court was occupied in hearing demurrers. In the afternoon the case of James Freedman et al. vs. the city of Jeffersonville was taken up and occupied the attention of the Court until the hour of adjournment. Perry and Bowles appear for the plaintiffs and R. Crawford, for defendant.

We understand that at the sale of property for city taxes to-day, there were very few bidders—nobody seeming willing to buy their neighbor's property for a mere song—New Albany Ledger.
